DESIGN PAD 2017

# DO THE TWIST

Joseph Walsh's clever new collection for PAD is crafted from wood that's been manipulated in ways that will intrigue the eyes and mind

## NATURAL CURVES

Irish wood designer Joseph Walsh is renowned for his inventive ways with the material, and his collection for PAD 2017 – a unique console table and shelf – is the latest example of his unique creativity. The hand-carved pieces are more than merely functional items: they are significant works of museum-quality design.

## BEST IN SHOW

These pieces are an extension of Walsh's Enigma series, where he employed the same technique of stripping the wood into thin layers, enabling it to be manipulated into free-form compositions. See the remarkable works at PAD – London's leading fair for 20th century art, design and decorative arts – where they will be on display with the Sarah Myerscough Gallery. ■ PAD London is on from 2-8 October at Berkeley Square, W1; PAD-FAIRS.COM
